EDUCATION

North American University

Houston, TX

Bachelor of Science / Computer Science, GPA: 3.9/4.0

08/2023 – 05/2026

- **Co-Founder & IT Team Lead**, Kyrgyz Student Association, including developing a website to promote Kyrgyz culture and foster community among students
- Member of ACM Club, engaged in activities and events promoting computer science and engineering knowledge
- Participant of Hackathon at Austin, created projects of financial literacy as telegram bot using python

WORK EXPERIENCE

AiKYNETIX

Houston, TX

Data engineer intern

02/2024 – 12/2024

- Developed AI models for human motion assessment and jump count analysis using PyTorch and Colab
- Developed scalable data pipelines, automated analyses, boosting efficiency by 2.4x
- Implemented computer vision techniques (OpenCV, TensorFlow) for real-time motion tracking
- Built scalable data pipelines, boosting efficiency by 2.4x
- Integrated APIs for real-time data processing and analysis
- Collaborated with teams to deliver innovative AI solutions

PROJECTS

AskNAU - AI trained model for Q&A type

Full-stack developer & AI/ML Engineer

- Developed an AI Q&A model using NLP and machine learning with Python, helping over 500 students at North American University get real-time answers to queries
- Built the front-end using React and styled with Tailwind CSS for seamless user interaction
- Optimized the model with NAU-specific data to improve response accuracy and relevance

Gesture-Detection app

Full-stack developer

- Developed a first AI vision with using TensorFlow which detects hand gestures and gives what it is showing
- In first version of program added hand gestures such as thumbs up and American sign language detector

Finance advisor app

Backend Developer

- Created a Telegram bot with for financial tracking and management for people
- Implemented algorithms for expense tracking, transaction management category selection.
- Successfully served over 100 daily users, with continuous improvements based on user feedback
- Developed using Python implemented algorithm to make bot learn by user input for categorizing

Essay assessment app

Full-stack developer & UX/UI designer

- Created dynamic web app to assess English as a Second Language Writing Exams IELTS, TOEFL
- Utilized GPT-4 APIs for deployment, server-side scripting, HTML, CSS, JavaScript, and Figma
- Boosted writing exam scores of 1000 students by 4 times every month through a free exercise platform source

Math preparation source app

Full-stack developer

- Built a web app for high school students, providing a free platform for final exam preparation
- Provided free mock exams for students of last 10 years materials making it available and easy

SKILLS & AWARDS

Programming Skills: C, C#, C++, Python, JavaScript, SQL, PHP, Java, TensorFlow, PyTorch, TypeScript

Full-Stack Web Development: JavaScript, PHP, CSS, HTML, MySQL, Figma, Canva, React, Git, GitHub, Next.js, Tailwind CSS

Interpersonal: Communication, Creativity, Teamwork, Flexibility, Punctuality, Math, Science, Team Management, Problem Solving

Languages: English, Russian, Turkish, Kyrgyz

Achievements: ICPC 2021 regional contest – 3rd degree diploma, AMC MATH COMPETITION – 2nd place (regional), Turkish International Olympiad - Bronze medal, 2022 International Essay Contest for Young People (participant)
